

# TREEPAD

user manual

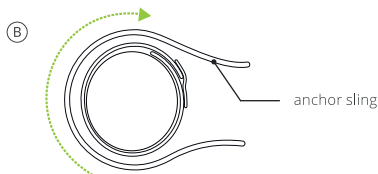

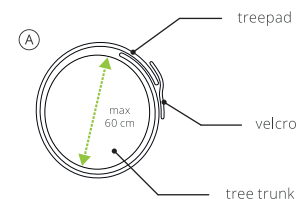

**READING AND UNDERSTANDING**  
Instruction for use are required to use this product.

TreePad is a textile tree bark protection. 3 mm width ensures sufficient abrasion and tear resistance even when frequently used. Simple anchor sling attachment system enables universal use in any situation. Maximum diameter of a tree for 1 piece of TreePad is 60 cm (200 cm perimeter). For trees with bigger diameter it is necessary to connect more pieces of TreePad. For proper function of the velcros an occasional maintenance is suggested.

## 3. INSTRUCTION FOR USE

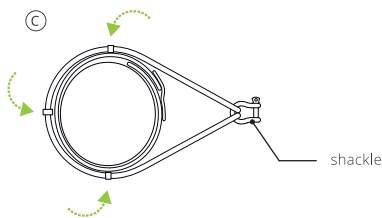

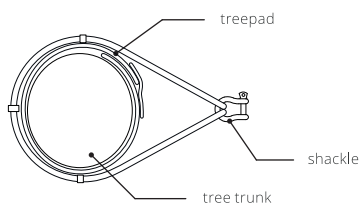

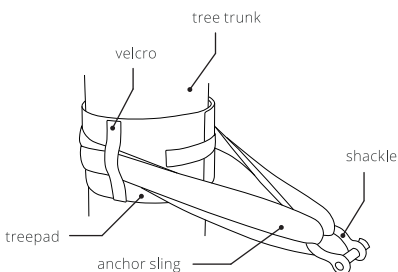

- Unroll TreePad and wrap it around the tree in required height. The stickier surface of TreePad must face out. Attach the end of band with a velcro.
- Wrap the anchor sling around the tree and TreePad. The anchor sling must be placed in its axis, so above and under the sling is at least 3 cm space for the velcros.
- Attach the anchor sling to TreePad with velcros on 3 spots - on sides and at the back of tree. For maximum strength of the velcros it is necessary to stick them to TreePad tightly.

## 1. WARNING

For slacklining only. Understand and accept the risks involved before participating. You are responsible for your own actions and decisions. Before using this product, read and understand all instructions and warnings that accompany it and familiarize yourself with its proper use, capabilities and limitations. Contact Equilibrium Slacklines if you are uncertain about how to use this product. Do not modify this product in any way. Check the condition of product components before and after each use. Enjoy your slackline!

## 2. DESCRIPTION

## 4. SPECIFICATION

TREEPAD SPECIFICATIONS:	
width	15 cm
length	200 cm
thickness	3 mm
weight	158 g
velcros	4 ks
